PORTFOLIO ↗

5+ years building production web applications

200+ B2B companies use Spiro, the CRM whose backend I build

7+ third-party integrations across ERP, e-commerce and ad platforms

PROFILE

Software Engineer with 5+ years building B2B SaaS and third-party integrations. On the backend of Spiro, an AI-powered CRM used by 200+ manufacturers and distributors, I sync data from **Epicor P21**, **NetSuite** and **Shopify** with **Ruby on Rails**, **PostgreSQL**, **Sidekiq** and **AWS**. Previously integrated Meta, Google and Snapchat ad platforms, and started on the frontend with **React** and **Next.js**.

EXPERIENCE

Software Engineer (Backend)

JAN 2026 – PRESENT

Klika · Client: [Spiro](#)

- Build backend services and product features for Spiro, an AI-powered CRM used by 200+ manufacturers and distributors, on **Ruby on Rails** and **PostgreSQL**
- Build and maintain ERP and e-commerce integrations (**Epicor P21**, **NetSuite**, **Shopify** and more), pulling data from customers' SQL databases and syncing customers, orders and products into Spiro
- Built internal tools that show integration status and data per customer company, plus automations for recurring integration and operations work
- Run asynchronous workflows and scheduled syncs on **Sidekiq**, using **sidekiq-cron** and unique job processing to keep high-volume work reliable and idempotent
- Contributed to communication features: **Twilio** calling and texting for Spiro's mobile app, and email account connections
- Integrate **AWS** (S3, Lambda, ECS, KMS) for file storage, serverless processing and encryption of sensitive customer data, deployed on **Heroku**

Software Engineer (Full Stack)

SEP 2024 – DEC 2025

Klika · Client: [WhatCampaign](#)

- Built an early-stage startup platform for media planning and launching ad campaigns across social networks from one place
- Integrated advertising platform APIs (Meta for Facebook & Instagram, Google, Snapchat and more) for campaign creation and publishing
- Developed it end to end: **Ruby on Rails** **RESTful APIs**, **ActiveRecord** domain models with complex business logic and a **React/TypeScript** frontend
- Took the product from early development to a pilot with its first clients

Software Engineer (Frontend)

FEB 2024 – AUG 2024

Trinity · Client: [Texttelligent](#)

- Built frontend features for Texttelligent's automotive product, mostly customer and service-department communication flows that let car dealerships text customers from one compliant inbox
- Developed **TypeScript** + **React/Next.js** applications with a consistent **Material UI** component system, working closely with backend engineers on API contracts

Software Developer (Frontend)

AUG 2021 – DEC 2023

[Experfy](#)

- Developed the frontend of Experfy's talent marketplace and hiring platform with **React** and **Ember**
- Built responsive, cross-device interfaces and improved page speed and usability

Frontend Engineer (Freelance)

MAR 2024 – DEC 2025

[Scanspire](#)

- Built the website for Scanspire, a penetration testing and security assessment company

SKILLS

Backend

Ruby on Rails Ruby Node.js
NestJS Express REST APIs
Sidekiq Action Cable Devise
Doorkeeper (OAuth 2) Pundit

Frontend

React Next.js TypeScript
JavaScript Redux
Tailwind CSS Chakra UI
Material UI Ember

Data & Cloud

PostgreSQL Redis
Elasticsearch
AWS (S3, Lambda, ECS, KMS)
Heroku CI/CD Sentry

Integrations

Epicor P21 Epicor NetSuite
Shopify ERP SQL databases
Meta (Facebook, Instagram)
Google Ads Snapchat Twilio

Quality & Tools

RSpec Minitest Jest
React Testing Library RuboCop
Git Figma

LANGUAGES

English

Professional working proficiency

Bosnian

Native

HOW I WORK

- ✓ End-to-end ownership
- ✓ Quality by default
- ✓ Clear communication
